

Department of Neuroradiology

Job opening for a Senior Interventional Neuroradiologist

Department of Neuroradiology, University Hospital Zurich

We are opening a highly attractive position for a senior interventional neuroradiologist from October 1st 2018 or by arrangement. We are open to adapt the job description according to your professional qualification and aims.

The Department of Neuroradiology at the University Hospital Zurich is an internationally renowned academic institution that covers the full spectrum of endovascular and minimally-invasive neuroradiological procedures employing latest technologies. Our service is provided in close cooperation with all clinical neuro-disciplines including dedicated intensive-care and stroke units and offers unique research opportunities (e.g. experimental neuroangiography laboratory, broad spectrum of advanced neuroimaging).

We offer a responsible, diversified position in an innovative and research-oriented team of neuro-interventional experts, with reasonable professional freedom, continuous education, adequate working time compensation and an attractive remuneration.

We are seeking for a dedicated interventional neuroradiologist who can cover the on-call service as well as complex elective procedures, and who wants to promote our clinical and academic activities as a team player.

Board certifications in radiology (and neuroradiology, if applicable) are required along with very profound neurointerventional knowledge and skills. Academic activities are strongly supported and economic qualifications are very welcome.

Please feel free to contact Professor Stippich for further details. You may send your application to:

Professor Dr. med. Christoph Stippich
